

Project Demo Planning

Date	04-July-2026
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Overview & Business Goal	Introducing the Smart Lender concept, problem context, and target parameters of automated risk assessment.	1.0 min	Sathvika Kolamudi (Lead Coordinator)
2	Workspace Code Execution Review	Demonstrating backend configurations: reviewing app.py micro-routes, data casting enforcements, and serialized model unpickling logic.	2.0 mins	Sathvika Kolamudi (Lead Coordinator)
3	Local Web Server Verification	Initializing the local multi-threaded development flask server thread via terminal commands.	0.5 mins	Sathvika Kolamudi (Lead Coordinator)
4	Frontend Risk Portal Walkthrough	Launching the web browser gateway context (http://127.0.0.1:5000) and detailing the layout grids of the system interface.	0.5 mins	Sathvika Kolamudi (Lead Coordinator)
5	Scenario Testing: Core Inference	Inputting a credit-favorable telemetry profile across the 11 feature parameters to dynamically generate the green CREDIT APPROVED dashboard panel live.	1.0 min	Sathvika Kolamudi (Lead Coordinator)
6	Exception Testing: Risk Delinquency	Inputting an adverse credit vector case (Credit_History = 0) to demonstrate the immediate dynamic routing swap to the red CREDIT DISAPPROVED panel asset.	1.0 min	Sathvika Kolamudi (Lead Coordinator)

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Focuses on customer pain points: high manual underwriting delays, structural target class imbalance, and data bias issues in risk screening.
2	Solution Overview	SMOTE neighborhood oversampling, standard score normalization scaling, and Random Forest Classifier model object serialization.
3	Live Feature Demonstration	To guarantee a seamless, high-score evaluation flow free from device switching delays or interface transitions, the complete 6-minute demonstration is delivered as a single continuous screen-recording directed by the Lead Coordinator.
