Team Coordination Notes:

Aspect	Details
Coordinator	Sathvika Kolamudi
Overall Team Coordination Rating (1-5)	5
Any issues during demo	Standard local resolution spike. During an early practice run, shifting raw form data vectors directly to the classification splits without processing caused an untyped matrix dimension error.
How issues were resolved	The team addressed this collaboratively before recording the final video. Samuel Abhishek implemented strict python data casting parameters (float()) inside app.py while Sathvika and Veera Lakshmi validated option index properties directly within

	the HTML markup to filter input arrays flawlessly at the gate.
